

# Village of Wilson Park Designs

Long Nguyen, Dalia Garcia, Teaching Assistant: Corey Winters, Professor: Harry Warren  
University at Buffalo *The State University of New York*

## Site Location

Source: GIS Software topographical map

Town of Porter

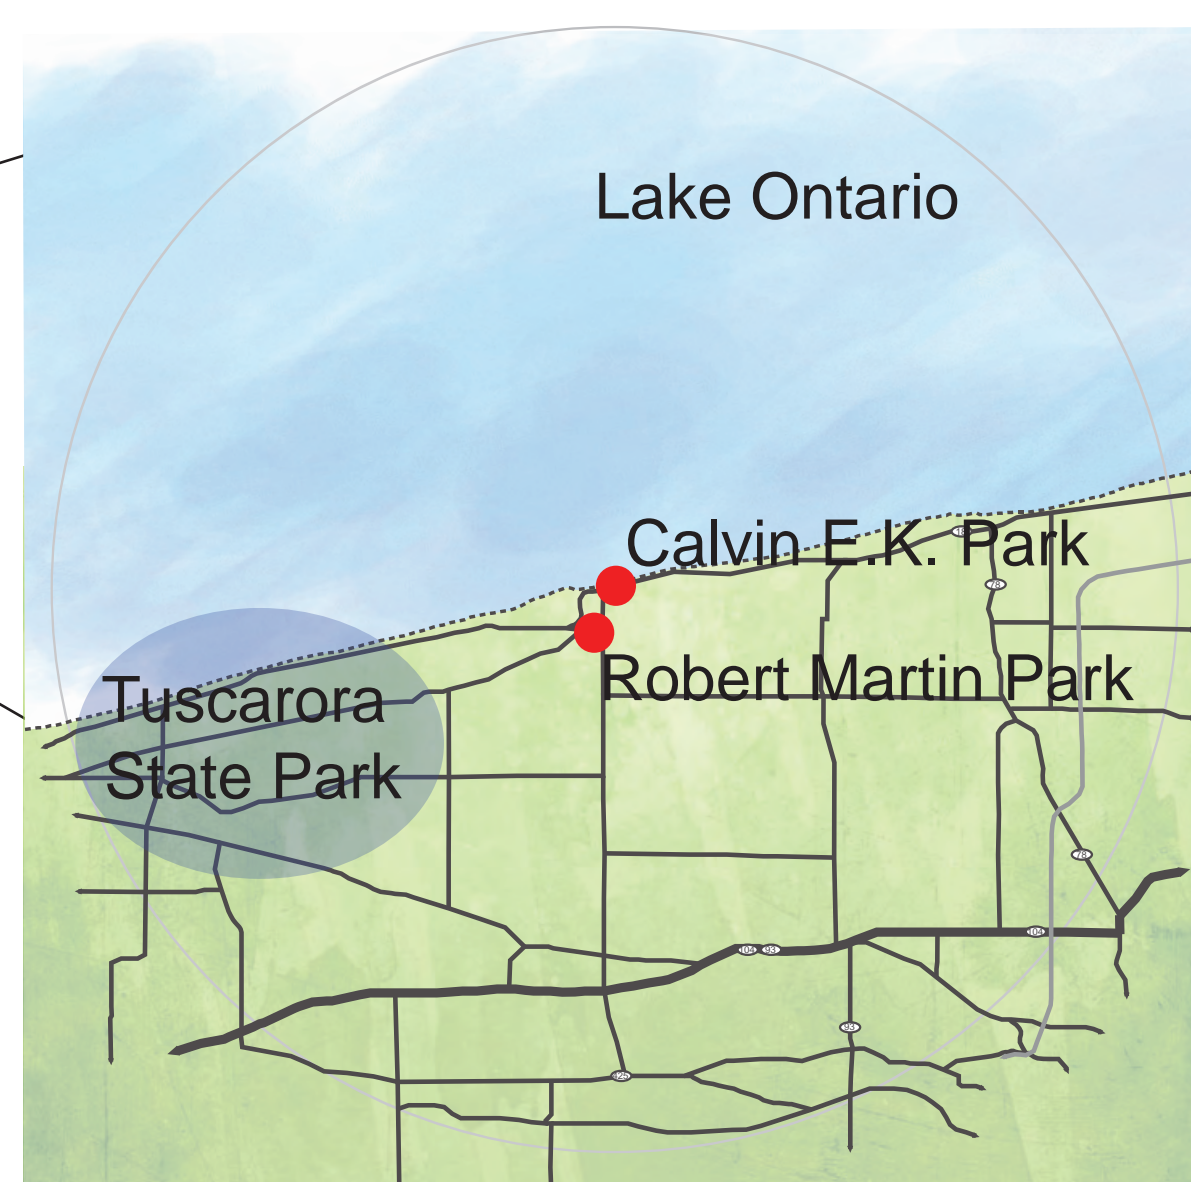

Town of Cambria

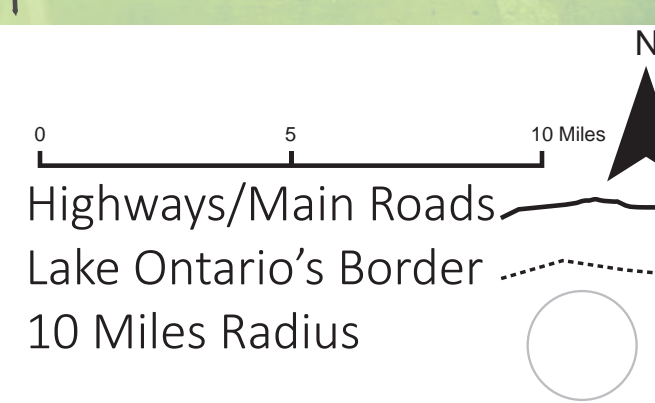

Town of Newfane

Krueger Park is located along the shoreline of Lake Ontario, in the central portion of Niagara County, New York, with the town of Porter to the west, the Town of Newfane to the east and the Town of Cambria to the south. Martin Park is located in the center village of Wilson. The Village of Wilson covers about .8 square miles and sits within the town.

## Purpose

According to community members from the Village of Wilson Krueger and Robert R. Martin, Sr. Village parks are heavily underused. The purpose of this project is to develop a list of program requirements for the site development concept.

Our purpose is to create:

- A park that fosters a sense of pride in the community
- Increase volunteer work
- Promote tourism
- Develop a clear and recognizable entrance into the parks
- Facilitate increase mix-use activities
- Encourage healthy activities in and around the parks
- Create integrated trail and paths through and around the parks
- Connecting trails to adjacent Tuscarora State Park

The development concept will take into consideration the future needs of the local communities while at the same addressing the current issues the two parks faces.

## Conclusion

This project engages students in “real-world” projects. Through studio workshops, site analyses and in person client meetings students tackle unique specific issues. The project demonstrates how parks can be an essential integral in communities across the world. A well design park will help improve a city’s health, while at the same time preserving and creating an identity for local communities.

## Study Funding

**Village of Wilson:** Private and Public Fundings  
**Robert Shibley** FAIA, Dean, School of  
Architecture and Planning  
**Dr. Ernest Sternberg** PHD, Chairman,  
Department of Urban and Regional Planning

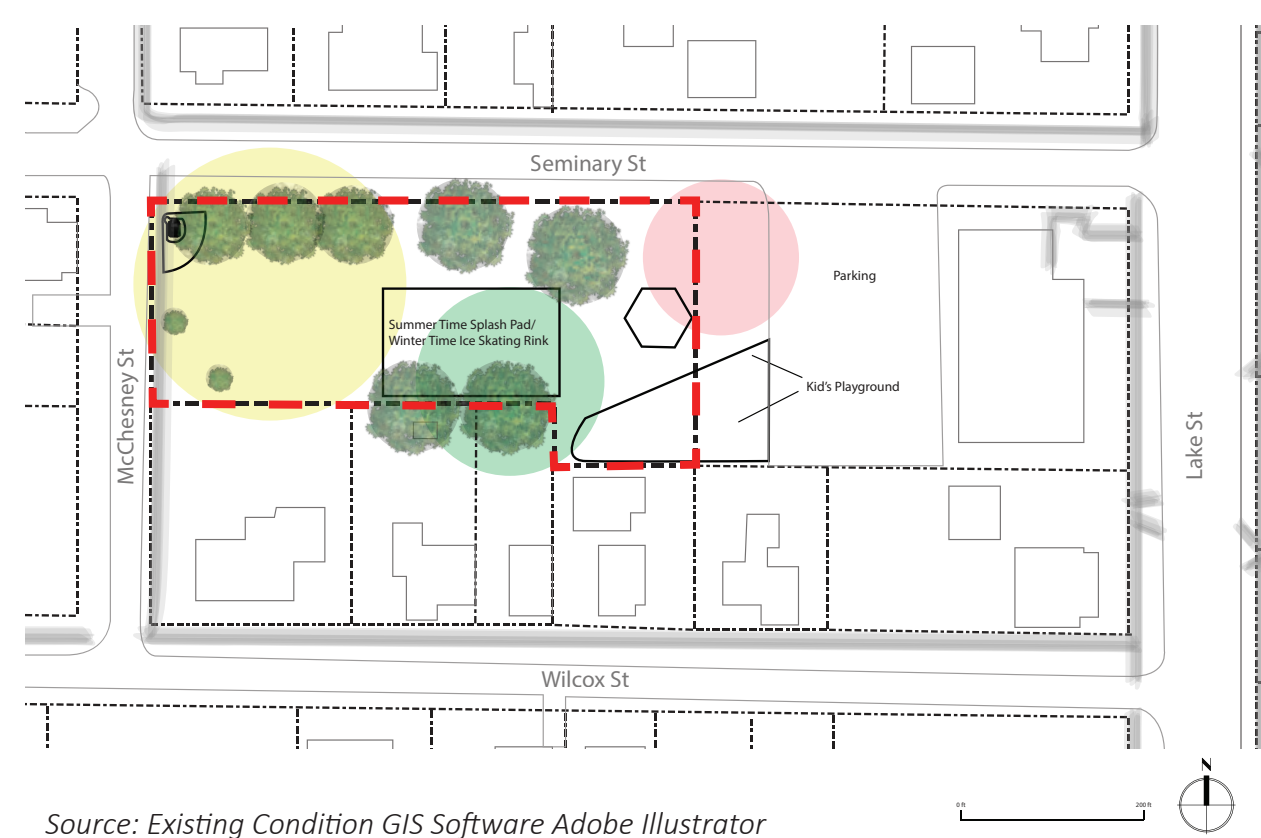

## Proposal For Robert R. Martin, Sr. Village Park

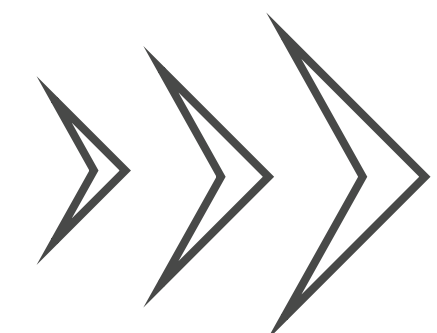

Create new sidewalks that lead into the park  
Create a clear main entrance

The current splash pad is currently heavily underused  
A proposal for the redevelopment of the current splash pad into a community center pavilion

A location for a community farmer's market  
Create entrances into the park  
Removed existing baseball field  
Increase path within the park for handicap accessibility. Proposal for a pergola walkway to helps create a separation between park space and vehicular traffic.

Source: Existing Condition Iphone Image

This rendering shows the proposed community gazebo. The gazebo will be built on the existing underuse splash pad and will serve as a space for events and gatherings. An over-head pergola pathway with new paved sidewalks on the north side will lead pedestrian into the north entrance. The pergola walkway helps to create a separation between park and street space.

The west side entrance provides open spaces for an open farmer's market. A path leading from the west to the east entrance allows residents to easily take a stroll through the park.

## Proposal For Calvin E. Krueger Park

A proposal for the auctioning of this site to help fund other projects in the park. Due to the lack of connection to the park the sites currently underuse.

Proposal for a new development of a lake side gazebo and sidewalk extensions to help create:

- Access to the water
- Increase recreational water activities
- Better use of existing parking space

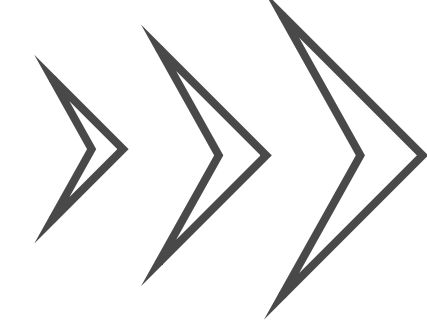

A proposal to remove the two current baseball fields  
Create an open space for community shared events  
Create direct view of Lake Ontario  
Community held petting zoo  
Using goats to eradicate poison ivy

The location is currently underused and misused due to lack of monitoring. The proposal for this location is to develop a basketball court. This will have an increase of mix use activities within the park. Repave the existing roads and add night lights to make a more pedestrian friendly access

A proposal to remove the baseball field and to expand the dog park  
Create new sidewalks that will lead to the dog park  
Development of a new heritage trail that will have connection to the proposed gazebo.

This rendering helps depict the new propose park concepts with the removal of the baseball field. It shows the added campfire site and the path of the propose historic trail. The 6ft high historic trail ramp will provide visitors a view of the whole park. The trail will include historical signage displaying the history of the village. The trail is inspired by the Village of Wilson's Comprehensive plan and wishes to celebrate the historical heritage of the area.
